</table>
| 10.45am - 12.45pm | DCRC Workshop 1  
Professor Christopher Etherton-Beer  
Geriatrician/Clinical Pharmacologist, Royal Perth Hospital; Clinical Academic in Geriatric Medicine, University of Western Australia.  
Approaches to quality use of medicine and de-prescribing for people living in residential aged care facilities  
Overuse of anti-psychotics and other psychoactive medicines is well documented and roundly criticised. This workshop reviews the evidence and ongoing research informing quality use of medicines by frail older people and offers practical ways to foster quality use among those living in aged care facilities. |
| 1.30pm - 3.30pm | DCRC Workshop 1  
Professor Christopher Etherton-Beer  
Geriatrician/Clinical Pharmacologist, Royal Perth Hospital; Clinical Academic in Geriatric Medicine, University of Western Australia.  
Approaches to quality use of medicine and de-prescribing for people living in residential aged care facilities  
Overuse of anti-psychotics and other psychoactive medicines is well documented and roundly criticised. This workshop reviews the evidence and ongoing research informing quality use of medicines by frail older people and offers practical ways to foster quality use among those living in aged care facilities. |
| 12.45pm - 1.30pm | Lunch (full day registrants only)                                    |
| 3.30pm - 4pm   | Afternoon Tea                                                        |
| 4pm - 5pm      | Concurrent sessions:  
Presentations from SA/NT researchers                                  |
| Presentation 1 | Dr Faizal Ibrahim  
Clinical Director SA Dementia Behaviour Management Advisory Service; Consultant Geriatrician at The Queen Elizabeth Hospital, Adelaide.  
Dignity in Dementia Care  
The presentation will report on evolution of the Dignity in Care Program in South Australia and the impact of the pilot program being championed at the Queen Elizabeth Hospital and Central Northern Local Health Network TCP. It promotes personalised service, respect and engages patients’ families particularly in the care of those with dementia and delirium. |
| Presentation 2 | Dr Christine Puitland Sally Francis  
Arts and Health Research Consultant. Arts in Health at FMC Arts Co-ordinator.  
Insights from Arts In Health at FMC (Flinders Medical Centre): towards a model of practice  
Arts in Health at FMC is one of the most ambitious and long-running programs of its kind in an acute care setting in Australia. This workshop looks at its implications for a range of care contexts to promote health and well-being. |
| Presentation 3 | Deborah Treherne Pamela Aldridge  
Dementia Educators, SA/NT Dementia Training Study Centre, Alzheimer’s Australia SA.  
Montessori and sensory methods as non-pharmacological interventions in practice  
There is growing evidence of the effectiveness of meaningful activity to address behavioural and psychological symptoms of dementia. Pamela will demonstrate Montessori principles and practice adapted for people with dementia and its profound effect on one client. Deborah will show how creativity is an effective way for people with dementia to engage in non-verbal expression. |
